TECH-ROLL
www.techrollscreens.com.au

Tech-Roll: The reputable name in insect screens

Enjoy the fresh air and keep insects out without compromising the interior.

Tech-Roll Screens have proven high quality with many awards being attained over the past 15 years overseas.

In consideration of both the functional and physical appearance of windows and doors the tech roll screen has been developed with new technology, the "Tech-Roll System".

Made and manufactured in Australia, our products are convenient, highly efficient and also elegant looking. Unique and neat features that are designed to be unnoticeable once fitted along windows or doors.

Suitable for various types of windows and doors, Tech-Roll Screens are a perfect compliment to Bi-Fold Doors, Stacker Doors and all types of windows.

Retractable Insect screens add another dimension to your home. They are stylish, versatile and offer a practical solution to existing flyscreens. A Tech-Roll screen will blend in with your existing décor and when it

is retracted you wouldn't know it was there.

Available in either a single or double unit. Our products are compatible with most door types and windows. With a Tech-Roll screen you are able to screen doorways up to 7 metres wide. Our products are measured, supplied and fitted by our professional installers.

Our Sunscreen option provides protection from the Sun's UV rays

The tech roll screen is unique in the fact the mesh is sewn in and attaches to an inside track. This ensures the mesh doesn't blow out like its competitors.

Our screens have been designed with the following features: A strong Aluminium frame, range of powdercoated colours as standard, mesh available in three different options, all units made to measure, Push button locking mechanism.

9 reasons to choose Tech-Roll

1. Go green and lower your energy costs using cross ventilation
2. Let the breeze in and keep insects out
3. Screens hide away when not in use
4. Blends with your existing décor
5. Screens suit any type of window or door
6. Easy operation
7. Low Maintenance
8. Value for money
9. Able to stop in multiple positions.

screen doorways up to 7 metres wide.

French doors

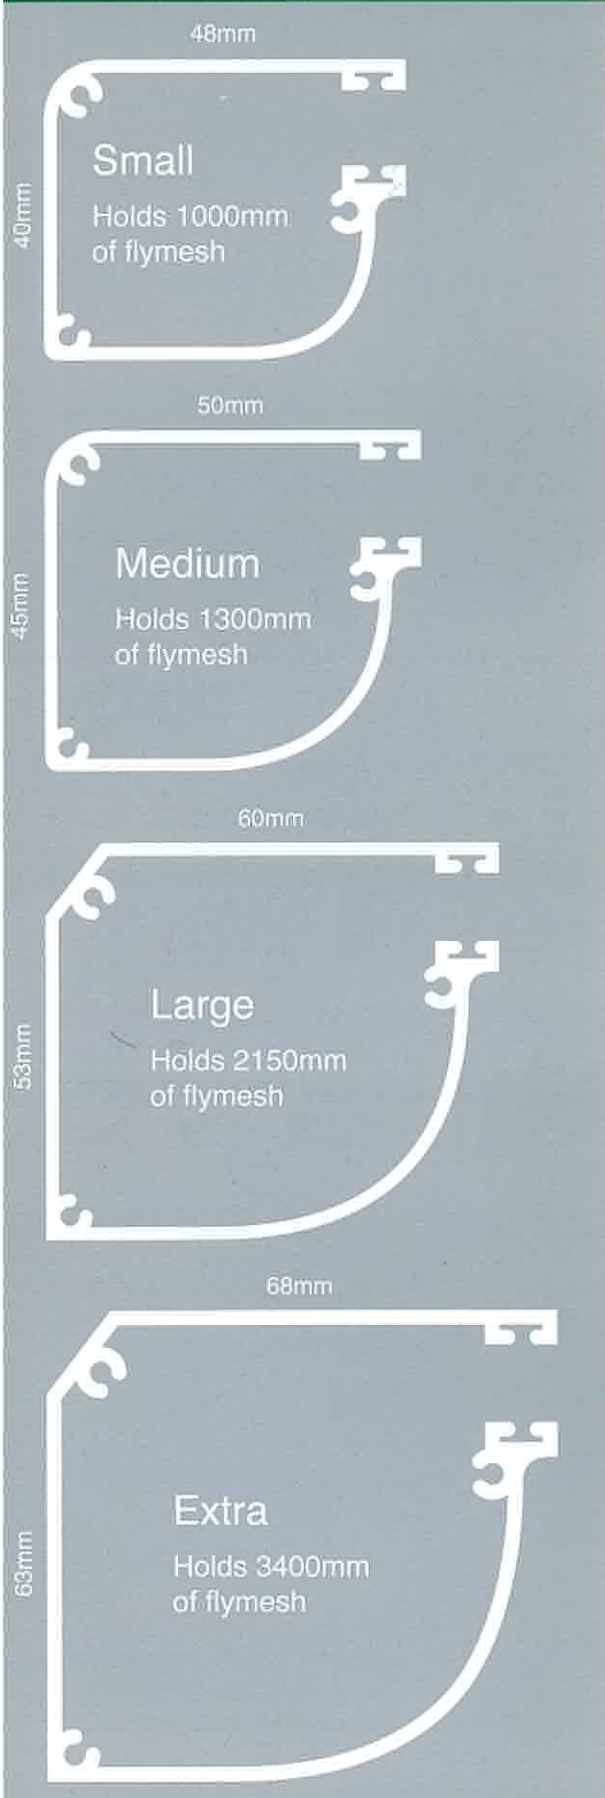

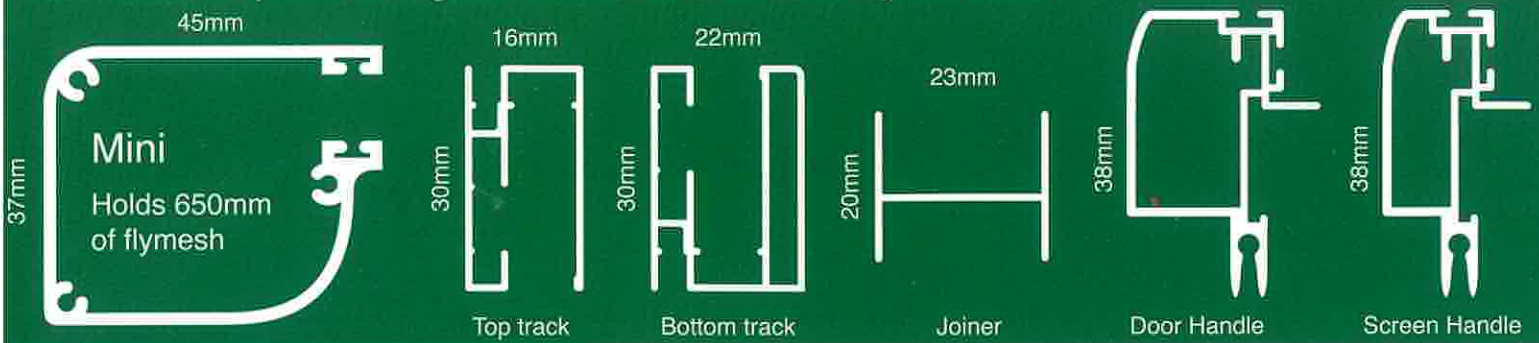

Tech-Roll composition

The body and rails are made of a high grade aluminium that is powdercoated to prolong the life of the unit. The mesh is fibreglass which has been chosen as it does not corrode and will last a long time.

Warranty

All products manufactured by Tech-Roll Screens Australia Pty Ltd are to be originally free from defects in parts and workmanship, which may impair or degrade the overall product performance. The products are provided with a seven (7) year conditional warranty on parts (excluding the screen mesh) and a 12 month warranty on labour.

Use these templates as a guide to see how much room you'll need.

Product features

Stylish design attractive, wind resistant

Four sides of the mesh have been sewn with plastic film and the insides of this film run along the tracks. Thus the mesh will not derail from track even in strong winds.

All parts are made from non-corrosive materials so the product can be installed to building exteriors without any problems

The product has been installed with an oil-decelerator and a gear-decelerator to prevent the handle from hitting the cassette when rewinding. The tension in spring can be easily adjusted by turning the screw attached to cassette.

Corner of unit showing, header cassette, adjustment screw, side stiles and moehair

Easy to operate and versatile

You can easily lock the screen by pressing the "push" button, The product boasts a simple and neat design, which allows you to adjust the screen and stop it from rolling at any point.

It is designed to fit almost any opening including internal reveals and faces and external surfaces of windows.

Quick and easy installation

Every product is equipped with double-sided tape for a quick and easy installation. This allows you to check whether the product has been correctly set up before installing the screws.

Colours available:.
